

NEW StreetWorks.Info Barrier Information System

The NEW StreetWorks.Info Barrier Information System employs unique Smart phone Apps like SightLine and Bluetooth technology to allow pedestrians access to roadworks information in real time, whilst also supplying contractors with real time data on the site installations.

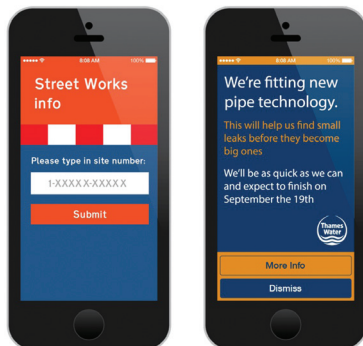

Features

- Enables sight impaired persons to navigate roadworks safely and have up to date roadworks information on their smart device.
- Contractor notification if any equipment leaves the site.
- Contractor notification if any equipment falls / is blown over.
- Contractor means of checking if all equipment has been cleared from site.
- Contractor means of establishing ownership of equipment.
- Shown installed on the Mergon Barrier System.

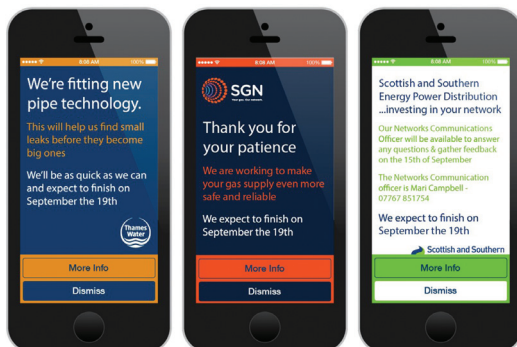

In this image taken from our video demonstration (available on request), barriers on the left were raised with pallets to represent kerb height and kerb ramp positioning.
