

The LowPro 15/10 System

The Complete Solution

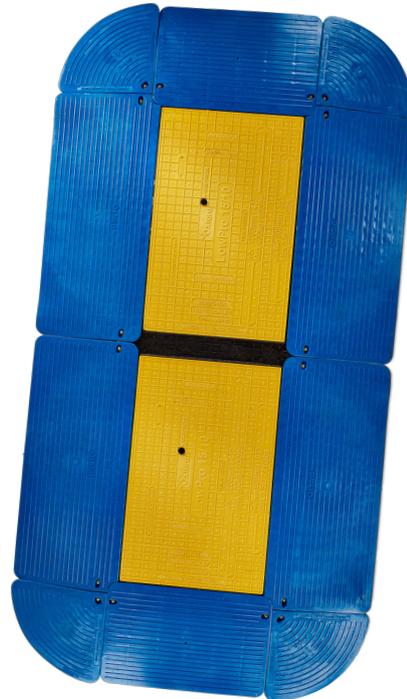

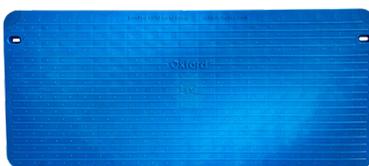

See reverse for ramp codes

Enable accessibility with your LowPro 15/10 Trench Covers, reduce trip hazards and create a gradual gradient with the NEW LowPro Infills and LowPro Ramps.

Each solution of the LowPro 15/10 system is available to order individually to complete your existing fleet.

- The LowPro 15/10 Driveway Board
- LowPro Ramps
- LowPro Infill Strips

Accessibility made easy

Make your LowPro 15/10 System accessible to all disabilities and buggy users by adding in the new LowPro Infills and LowPro Ramps. They remove trip hazards, enabling DDA compliance, and have a smooth 1:12 gradient.

The LowPro 15/10 Driveway Board

Suitable for 3.5T vehicles across a 900mm trench. The recognised solution to cover driveways across the country is now available as a complete solution.

The LowPro 15/10 Driveway Ramp

LowPro ramps create a gradual 1:12 slope up to the LowPro 15/10, creating a smooth transition over the excavation cover for wheelchairs and buggies. These are available in 3 sizes: Long, Short and Corner Ramps.

Infill Strips

Sitting between the covers, once installed the Infills create a smooth platform for pedestrians and vehicles to pass over. Connecting LowPro Trench Covers with Infill strips prevents them from drifting, which can expose the excavation underneath. Quick and easy to install, the LowPro Infill strips are available in 4 sizes and are compatible with the LowPro 15/10 Driveway Board and LowPro 12/8 Footway Board.
